## **3Q Proactive Event: Hazard Identification and Risk Assessment**

**Week 8: Risk assessment is easy and obtainable**

**September 6, 2010**

# Week 8. Deliverables

- Today: Discuss how easy and obtainable risk assessment is. And highlight how much we rely on our values to make personal decisions related to risk assessment.
- At the end of the 3<sup>rd</sup> Quarter:
  - 1) Increase individual and group competency in Hazard Identification and Risk Assessment,
  - 2) Reinforce the need for teamwork (or relationships) to develop dialogue (or communication skills) around risk assessment,
  - 3) Understand how we control our environment through our behaviors. Introduce accountability into the equation. Are you doing what you say you're going to do?

We all make dozens of risk-based decisions like - having a backyard barbeque, walking across the street, riding a bike, walking down stairs, going skydiving, entering a plant, working at heights, working on a computer ...

Do you weigh the probability and likelihood of a negative outcome before you make a choice to perform an action?

What risks are we willing to live with? And Why?

*Ex. I like skydiving... it's fun. I know that there are risks involved, but, since my life depends on my ability to mitigate those risks, I take my hobby seriously. I've taken extensive training, and...*

# Take 5 to Recognize

Proactive Engagement takes courage. . . . .

## Take 5 to Recognize

During your activities, what were the conversations which stimulated engagement and had a positive impact on our understanding and awareness of risk?

Ask each participant to identify what they “valued most” from the conversation and have them recognize the individual for making this contribution.

People deserve to hear they are appreciated!
